DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 7 and 10 - 16, drawn to an interposer with card supporting lip, classified in class 257, subclass 679.
- II. Claims 8-9 and 17 - 19, drawn to an apparatus or system with voltage regulator element, classified in class 257, subclass 712.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the invention of Group I relates to a card and an interposer, the invention of Group II relates to a heatsink, and integrated circuit die and a heatsink.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy K Potter whose telephone number is 308 - 4106. The examiner can normally be reached on M-F.
